PROFESSIONAL SUMMARY

Driven and detail-oriented Computer Science undergraduate (B.Tech, 2028) at Quantum University with a minor specialization in Data Analytics. Proven ability to bridge complex technical domains — from building decentralized blockchain-AI applications to co-authoring peer-reviewed research in computational nutrition. Experienced in full-stack development, machine learning, and SEO-driven digital strategies. A collaborative leader with demonstrated impact as Vice President of a college music organization and active Student Council member. Seeking opportunities at forward-thinking MNCs where analytical rigor and engineering depth create measurable business value.

EDUCATION

Bachelor of Technology — Computer Science Engineering (CSE Core)

2024 – 2028

Quantum University, Roorkee, Uttarakhand | Minor: Data Analytics

CGPA: 8.01 / 10

- Awarded **merit scholarship of INR 40,000** based on university entrance scholarship examination performance.
- Minor specialization in **Data Analytics** — coursework includes statistical modelling, data visualization, and business intelligence.
- Relevant Coursework:** Data Structures & Algorithms, Database Management Systems, Machine Learning, Web Technologies, OOPS with Java, Computer Networks.

INTERNSHIP EXPERIENCE

Full Stack Development Intern

June 2024 – July 2024

CodSoft | Virtual Internship

Remote

- Accomplished delivery of **3+ production-ready frontend projects** (landing pages, personal portfolio with backend integration) as measured by successful deployment, by independently implementing **HTML5, CSS3, JavaScript, TypeScript, and React** within a 4-week timeline.
- Reduced UI inconsistencies across project components by applying **responsive design principles and CSS animations**, ensuring cross-browser compatibility on all deliverables.
- Enhanced backend connectivity for static frontend projects using **basic server-side integration**, demonstrating end-to-end development capability as a first-year developer.

KEY PROJECTS

PharmaTrace — Pharma Supply Chain Traceability & Counterfeit Detection System

2024 – Present

Solidity • Hardhat • Ethers.js • Python • FastAPI • XGBoost • React (Vite) • Tailwind CSS • Web3.py

Individual Project

- Architected a **full-stack decentralized application (DApp)** integrating Ethereum smart contracts and an AI engine to track pharmaceutical batches from manufacturing to consumer — addressing a global counterfeit drug market valued at **\$200B+**.
- Accomplished **100% ML classification accuracy** (precision/recall: 1.00, log-loss: 0.00036) as measured on a 5,000-sample synthetic dataset with 15% class imbalance, by implementing an **XGBoost Classifier (300 estimators)** trained on 7 supply-chain metrics including transit delay, route deviation, and supplier trust scores.
- Achieved **9/9 passing backend AI tests** and authored **17 Solidity unit tests** for smart contract validation, ensuring end-to-end reliability of the counterfeit detection pipeline.
- Delivered a functional **React DApp in Demo Mode** with pre-loaded batch data, enabling live stakeholder demonstrations of the blockchain-AI integration prior to mainnet deployment.

Intelligent Dietary System — AI-Powered Nutrition & Meal Planning Engine

2024 – 2025

YOLOv8 • CNN • SSD • NSGA-II • LSTM • Random Forest • React Native • Firebase • Expert Systems

Research Project | Co-Author

- Co-authored a **research paper (pending publication)** under faculty mentor Ms. Ishita Singh (Dept. of BSc Nutrition & Dietetics) — an interdisciplinary project bridging **Computer Vision, Evolutionary Algorithms, and Clinical Nutrition**.
- Designed a **multi-modal food recognition pipeline** using YOLOv8, CNN, and SSD architectures for real-time object detection, enabling automatic identification of dietary components from meal photographs.

- Implemented a **multi-objective nutritional optimization engine** using NSGA-II Evolutionary Algorithm to generate personalized meal plans balancing caloric intake, micronutrients, and dietary constraints simultaneously.
- Built **behavioral and food-waste prediction models** using LSTM neural networks and Random Forest classifiers, integrated with a React Native frontend and Firebase Cloud Messaging for real-time dietary alerts.

TECHNICAL SKILLS

Languages	Python, Java, JavaScript, TypeScript, Solidity, HTML5, CSS3, Dart (Flutter)
Frontend	React.js (Vite), React Native, Tailwind CSS, Bootstrap
Backend & APIs	FastAPI, Node.js, Web3.py, Ethers.js, Firebase Cloud Messaging
Blockchain	Solidity, Hardhat, Ethereum DApp Development
AI / ML	XGBoost, YOLOv8, CNN, SSD, LSTM, Random Forest, NSGA-II, Scikit-learn
Databases	MySQL, Oracle Data Modeler
Data & Analytics	SPSS, Hadoop Framework, Data Visualization, Statistical Modelling
Tools & Platforms	Git, GitHub, VS Code, Postman, Hardhat Test Suite

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

Vice President — Q Encore (Music Club)

2024 – Present

Quantum University, Roorkee

- Accomplished recognition as a **top-2 performer in 7+ consecutive inter-college events** including the Annual College Fest, as measured by competition placements, by leading musical direction and coordinating ensembles of **20–47 participants**.
- Organized and executed **4+ large-scale events** — Open Mic, Freshers' Party, Farewell, and Annual College Fest — managing end-to-end event logistics, artist coordination, and audience engagement.

Active Member — Student Council

2024 – Present

Quantum University, Roorkee

- Represented student interests in institutional governance, contributing to policy discussions, event planning, and campus community initiatives.

CERTIFICATIONS & WORKSHOPS

Workshop: Agentic AI, Gemini, Claude & ChatGPT

2025

Hands-on workshop covering agentic AI workflows, prompt engineering, and multi-model LLM integration strategies.

CodSoft Full Stack Development Internship Certificate

2024

Awarded upon successful completion of 1-month virtual internship with production-ready project deliverables.

ADDITIONAL INFORMATION

Languages	English (Professional — 90%), Hindi (Fluent), Bengali (Native)
Instruments	Guitar, Drums, Keyboard, Sarod (Classical), Flute (Side & Front), Kettle Drums, Trumpet, Bugle — Former School Band Member
Sports	Football — Attacking Midfielder Competitive club-level experience
Interests	Open Source Contribution, Blockchain Technology, AI/ML Research, Music Production, Competitive Sports
